### CONFORTO, SEGURANÇA E ECONOMIA

#### O QUE É?

Uma misturadora termostática mantém a temperatura selecionada durante todo o duche. Se alguém utilizar água quente noutra parte da casa, a temperatura do chuveiro permanecerá sempre constante.

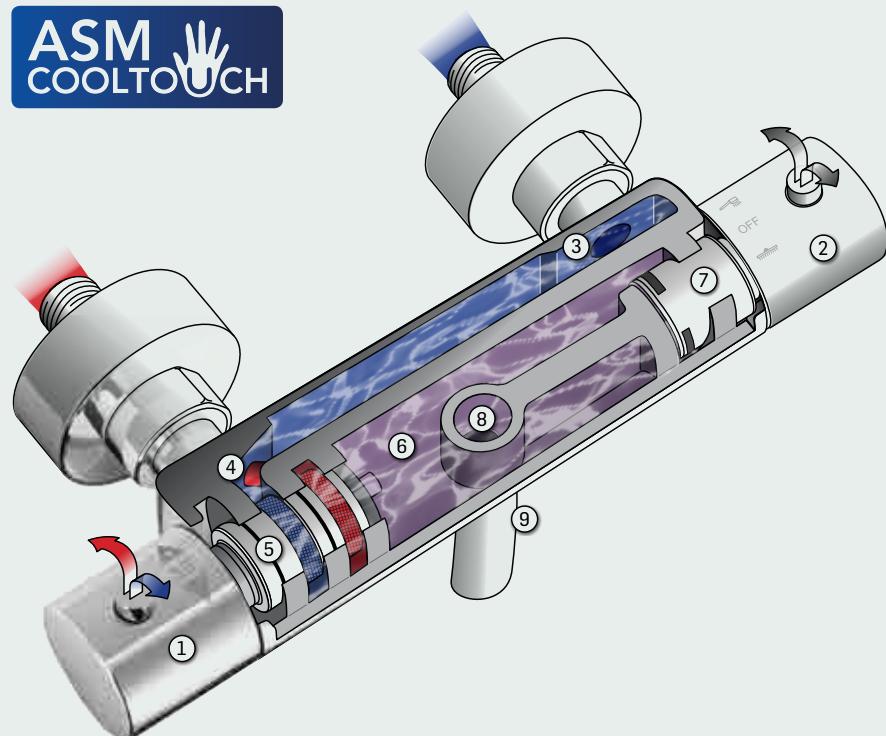

#### COMO FUNCIONA?

A válvula termostática mistura a água quente e a água fria para alcançar a temperatura selecionada e reage instantaneamente a qualquer alteração da pressão ou da temperatura da água de abastecimento, reajustando a mistura de água quente e água fria. Se a água fria for totalmente cortada por acidente, as torneiras termostáticas reagem imediatamente e deixam de fornecer água quente, evitando assim queimaduras.

#### QUAIS AS VANTAGENS?

Segurança: limita o acesso às temperaturas elevadas e diminui assim fortemente o risco de queimadura. Ainda a tecnologia **ASM COOL TOUCH** assegura que a superfície externa da misturadora termostática nunca se torne quente demais para tocar, evitando assim queimaduras tão frequentes quer em crianças quer em pessoas mais idosas.

Economia: com uma misturadora termostática poderá economizar água e energia. As misturadoras termostáticas permitem realizar mais de 50% de economia de água face às misturadoras tradicionais, logo há também economia de energia porque não será necessário aquecer uma quantidade tão grande de água. Comodidade e conforto: a temperatura pré-selecionada alcança-se em segundos e mantém-se sempre constante, mesmo que feche a água por alguns minutos, a misturadora termostática reencontra automaticamente a temperatura exata quando reiniciar o banho.

## **THERMOSTATIC ASM**

### **CONFORT, SAFETY AND ECONOMY**

#### **WHAT IS IT?**

A thermostatic mixer maintains the selected temperature throughout the shower. If anyone using hot water elsewhere in the house, the temperature of the shower will always remain constant.

#### **HOW IT WORKS?**

The thermostatic valve mixes hot and cold water to reach the selected temperature and reacts instantly to any change of pressure or the temperature of supply water, readjusting the mix of hot and cold water. If the cold water is completely cut off by accident, the thermostatic taps reacts immediately and stop to provide hot water, in way to avoid burns.

#### **WHICH THE ADVANTAGES?**

Safety: Limits access to high temperatures and thus strongly reduces the risk of burn. Still the **ASM COOL TOUCH** technology ensures that the outer surface of the thermostatic mixing never becomes too hot to touch, thus avoiding burns so commons, in children or elderly people.

Economy: With a thermostatic mixer can save water and energy.

The thermostatic mixing allow more than 50% water savings compared with the traditional mixers, so there is also energy saving because isn't necessary to heat such a large amount of water.

Commodity and comfort: The preselected temperature can be reached in seconds and always remains constant even with the water closed by few minutes. The thermostatic mixer automatically finds the exact temperature with the bath restart.

### **CONFORT, SÉCURITÉ ET ÉCONOMIE**

#### **C'EST QUOI?**

Un mitigeur thermostatique maintient la température sélectionnée pendant toute la durée de votre douche. Si quelqu'un utilise l'eau chaude dans une autre partie de la maison, la température de l'eau de votre douche restera constante.

#### **COMMENT ÇA MARCHE?**

La valve thermostatique mélange l'eau chaude et l'eau froide pour atteindre la température sélectionnée et réagi instantanément à tout changement de pression ou température d'eau de la source, réajustant le mélange d'eau chaude et froide. Si par inadvertance on coupe totalement l'eau froide, les robinets thermostatiques réagissent immédiatement et coupent l'eau chaude évitant ainsi des accidents et des brûlures graves.

#### **QUELS SONT LES AVANTAGES?**

Sécurité : limite les températures trop élevées et diminue fortement le risque de brûlures. En plus, la technologie **ASM COOL TOUCH** assure que la superficie externe du mitigeur thermostatique ne sera jamais

brûlante au toucher, évitant ainsi les accidents de brûlures si fréquents chez les enfants et les personnes âgées.

Économie : Avec un mitigeur thermostatique pourrez économiser de l'eau et de l'énergie. Les mitigeurs thermostatiques vous assurent plus de 50% d'économie d'eau en comparaison avec les mitigeurs traditionnels et cela se traduit aussi en économie d'énergie, car ne pas nécessaire chauffer une grande quantité d'eau chaude.

Commodité et confort : la température présélectionnée obtenue en quelques secondes et celle-ci se maintiendra constante, même si on ferme l'eau pour quelques minutes. Le mitigeur thermostatique retrouve automatiquement la même température quand vous recommencerez votre douche.

## **TERMOSTÁTICOS ASM**

### **CONFORT, SEGURIDAD Y ECONOMIA**

#### **¿QUÉ ES?**

Un mezclador termostático mantiene la temperatura seleccionada a lo largo de la ducha. Si alguien utiliza el agua caliente en otra parte de la casa, la temperatura de la ducha permanece siempre constante.

#### **¿CÓMO FUNCIONA?**

La válvula termostática, mezcla agua caliente y fría para alcanzar la temperatura seleccionada y reacciona instantáneamente a cualquier cambio de presión o de la temperatura del suministro del agua, haciendo el reajuste de la mezcla de agua caliente y fría. Si el agua fría se corta completamente por accidente, los grifos termostáticos reaccionan inmediatamente y dejan de proporcionar agua caliente para evitar quemaduras.

#### **¿CUÁLES LAS VENTAJAS?**

Seguridad: Limita el acceso a las temperaturas elevadas y disminuye así fuertemente el riesgo de quemaduras. Incluso la tecnología **ASM COOL TOUCH** asegura que la superficie externa del mezclador termostático nunca llega a ser demasiado caliente al tacto, evitando quemaduras tan frecuentes tanto en niños como en personas mayores. Economía: Con un mezclador termostático se puede ahorrar agua y energía. La mezcladora termostática permite ahorrar más de 50% del agua en comparación con los mezcladores tradicionales, por lo que también se ahorra energía ya que no es necesaria calentar una gran cantidad de agua.

Comodidad y confort: La temperatura previamente fijada llega en segundos y siempre permanece constante, incluso si se cierra el agua durante unos minutos, la mezcladora termostática vuelve a encontrar automáticamente la temperatura exacta cuando reinicie el baño.
